PROJECT SUN STREAK (U)

WARNING NOTICE: INTELLIGENCE SOURCES AND METHODS INVOLVED

Session Procedures Report (S/NF/SK)

PROJECT NUMBER: 8713

SESSION NUMBER: 2

DATE OF SESSION: 15 OCT 87

TARGET COUNTRY:

REFERENCE:

MISSION STATUS:

TECHNIQUE UTILIZED: CRV

SOURCE IDENTIFIER: 011

1. (S/NF/SK) Monitor Tasking: Per original tasking instructions; no amplifying data received.
2. (S/NF/SK) Source Tasking: Source was provided with only the coordinates (supplied) and instructed to spend a good deal of time in Stages I and III. (See the comment below regarding a bad call on the part of the monitor).
3. (S/NF/SK) Summary: The Viewer's summary and sketches are attached.
4. (S/NF/SK) Comments: This target seems unusual and a little strange--the Viewer produced some unique ideograms in Stage I. There was a good site lock-on during the session, but the target itself may possess several, disparate physical/geographic elements. Much care was taken during the session to avoid/preclude AOL. However, the monitor should have used Stage VI tools rather than trying to take a short cut when exploring the "purpose" of the "green energy". Consequently, data subsequent to that cue ("purpose") is subject to AOL. The monitor will not repeat this error.

## SESSION SUMMARY

SESSION: 15 OCT 87, 1309-1442hrs

There appears to be a land/water/structure interface at the target site. There is something associated with the structure that is hard, sloping, rounded, and thick (see sketch, page 5). Somewhere in the background <sup>is</sup> a hard, rough, jagged, very tall, natural feature with a dark, flat, top (see sketch, page 5). Getting the impression of a rugged, mountainous area. Inside the structure is a green energy that is constantly radiating, with waves of pulsed energy. The purpose of this energy is to create a violent, star-burst explosion with colors of red, orange, white and blue.

COMMENTS: This is a very confusing target
